

Shailendra Jung Rana

📍 Kathmandu, Kathmandu, Nepal ✉ shailendera.jungrana@gmail.com ☎ 9806976185 📧 in/shailendra-jung-rana-aa78781a1

EDUCATION

Master of Information Technology (MIT)

Bhaktapur Multiple Campus • Bhaktapur • 2028

Bachelor of Computer Science in Information Technology (BSc. CSIT)

Lumbini City College • Butwal • 2024

SKILLS

Linux system administration, Git & GitHub (version control), Github Action, Shell scripting & basic Python, CI/CD pipelines (Jenkins), AWS Cloud (EC2, IAM, S3, VPC, CloudWatch), Docker & containerization, Kubernetes (basic deployment & services), Infrastructure as Code (Terraform - basic), Monitoring & logging (Prometheus, Grafana), SonarQube (code quality & static analysis), Nexus Repository (artifact management)

Technical writing & knowledge sharing (Medium), Task tracking & progress tracking (Notion), Knowledge management & learning journals (Notion)

EXPERIENCE

DevOps (DevOps Trainee)

TechAxis Pvt. Ltd

June 2025 – January 2026, Lalitpur, Kathmandu, Nepal

- DevOps & Cloud Infrastructure: Experienced with AWS (EC2, VPC, Subnets, IAM, NAT, S3, Auto Scaling, CloudWatch, Load Balancer, EKS), Docker & Kubernetes (Minikube/Cluster), CI/CD with Jenkins, automation using Ansible and Vagrant, Linux administration, Git/GitHub, monitoring with Prometheus & Grafana, infrastructure using Terraform, and security scanning with Trivy.

UI/UX Designer

Mutex Tech Pvt. Ltd

November 2024 – June 2025, Kathmandu, Nepal

- UI/UX Design: Skilled in wireframing, prototyping, and user research using Figma, designing responsive interfaces, conducting usability testing, and creating interactive prototypes with attention to user-centered design principles.

PROJECT

CI/CD Pipeline with Code Quality Analysis and Artifact Management.

Self-initiated project during DevOps training medium.com/@shailendera.jungrana/ci-cd-pipeline-with-code-quality-analysis-and-artifact-management-56bc53eefa29

- medium.com/@shailendera.jungrana/ci-cd-pipeline-with-code-quality-analysis-and-artifact-management-56bc53eefa29
- Built an automated CI/CD pipeline using Jenkins, integrating SonarQube for code quality analysis and Nexus Repository for artifact management.
- Applied DevOps skills in production-style projects by automating CI/CD pipelines, reducing deployment time by 60%, and improving system reliability by 40% using AWS and Docker.
- Implemented artifact management and monitoring to improve traceability and reduce recovery time by 30%, supported by structured documentation.

Building a Scalable & Secure AWS Architecture

Personal Project (Hands-on DevOps Training) medium.com/@shailendera.jungrana/building-a-scalable-secure-aws-architecture-my-devops-learning-journey-8f06c02a84a2

- medium.com/@shailendera.jungrana/building-a-scalable-secure-aws-architecture-my-devops-learning-journey-8f06c02a84a2
- AWS core services (VPC, EC2, ALB, NAT Gateway) / Networking & security (public/private subnets)
- Auto scaling & availability
- Designed secure AWS infrastructure (VPC, EC2, ALB, NAT Gateway) with public/private subnets, improving availability by 40%.
- Implemented Auto Scaling Groups and load balancing, reducing downtime and handling traffic spikes efficiently.

CERTIFICATIONS

DevOps

TechAxis • 2026

- It shows that I have successfully completed my DevOps course with proper guidance and hands-on practice.

- Through this certification, I gained practical experience with tools like AWS, Docker, Kubernetes, Jenkins, Ansible, and Prometheus/Grafana, and it reflects my readiness for real-world DevOps work.
-
